

Промпт КЛАСНЫЕ подсказки Nano Banana Pro, которые вы ДОЛЖНЫ попробовать

1.

" Мемориал Линкольна на американском пенни " — macro photoreal miniature diorama physically built onto the reverse side of the coin mentioned above, held in real human hands between thumbs and index fingers (both hands visible). The landmark is extruded from the coin surface into tiny 3D miniature architecture, with tiny scale-model people interacting around it. Add thematic micro-details along the rim (tiny trees, street signs, benches, miniature props) matching the landmark's culture and era. Warm studio key light with soft fill to emphasize metallic specular highlights and subtle patina; true macro product photography; tilt-shift look with controlled selective focus on the miniature while keeping coin engravings readable. Realistic skin texture with pores and clear fingerprints; include natural smudges/fingerprint marks on the metal for real-world scale. Clean studio blurred background with gentle bokeh, ultra-high detail, cinematic miniature realism. **NEGATIVE:** extra coins, missing coin, deformed hands, extra fingers, fused fingers, unrealistic anatomy, warped engravings, random text, watermarks, logos, plastic toy look, cartoon, CGI render look, low detail, heavy blur, artifacts

2.

BRAND_NAME: "[НАЗВАНИЕ БРЕНДА]". A high-end studio advertising portrait of exactly one smiling person holding one aluminum beverage can of BRAND_NAME very close to the camera, with the can and the person's face both in the foreground; playful ultra-wide fisheye look (10–14mm), centered composition, energetic immersive perspective, but keep the BRAND_NAME logo clean, correctly spelled, and readable on the can facing the camera. The neural network should invent the drink type, can color, wardrobe colors, and background palette automatically to match BRAND_NAME's branding and create an on-brand modern gradient backdrop with smooth transitions. Use diffused cinematic studio lighting with controlled specular highlights on the aluminum can and glossy reflections on the outfit, soft dimensional shadows, minimal clean soda campaign composition, slightly desaturated yet fresh editorial commercial look. **FACE CONSISTENCY:** the face must match the uploaded reference image exactly (identity, facial structure, realistic skin tone), no facial alteration. Avoid: watermark, extra text/slogans, misspelled logo, warped typography, deformed/crushed can, extra hands/arms, fused fingers, blur on face or can.

3.

{IDEA="Париж внутри листа платана осенью"} Inspired by leaf-cutout art: generate a cinematic macro image that literally visualizes IDEA as a hollow cutout carving inside a single complete real leaf. The leaf is centered, fully in frame; all hollow cutouts are clean and readable, seamlessly connected by the leaf's natural vein structure (no floating islands).

Botanical realism: authentic leaf texture, realistic thickness at cut edges, crisp silhouettes, natural imperfections. Dew droplets on the leaf surface glisten under soft sunlight, producing subtle depth, micro-shadows, and gentle contrast. Background: softly blurred natural setting with harmonious bokeh and shallow depth of field, no distractions. Ultra-detailed, high clarity, realistic color grading. [web:4][web:26]

4.

{youtube} Photorealistic studio food image of a hyper-realistic cake meticulously sculpted to perfectly match the exact silhouette and proportions of the logo; crisp clean edges, accurate geometry, smooth fondant/ganache exterior that convincingly mimics the logo object; placed on a pristine matte white table with a minimal bright background; one clean partial bite taken out to shatter the illusion, revealing multiple appetizing layers (sponge, frosting, crumbs) with intricate bite-mark detail and a few realistic crumbs near the bite; slightly overhead 3/4 camera angle, centered composition; soft, diffused studio lighting to enhance textures and cast subtle natural shadows for depth; vibrant playful colors inside the layers contrasted against the object-mimicking exterior; ultra-sharp focus, high detail, subtle whimsical undertone while staying fully photorealistic; avoid blur, extra bites, deformed logo shape, messy background, watermark, text artifacts.

5.

EventName: " посадка на Луну ". Create an ultra-realistic, museum-quality miniature diorama photo of EventName, automatically selecting the single most iconic, widely recognizable peak moment associated with this event (one decisive snapshot, not a collage) and depicting it with historically plausible props, uniforms/objects, and setting cues that instantly communicate the event. Build a highly detailed raised diorama base with layered terrain and architecture: micro-structures, tiny signage-like shapes (NOT readable), realistic scale model craftsmanship, visible hand-painted edges, micro scratches, tiny dust specks, subtle wear, miniature glue seams where appropriate, fine-grain materials, and crisp bevels. Characters (only if needed): miniature figurines with realistic clothing folds and gear silhouettes, but no facial details and no readable insignia. Rendering/photography style: ultra photoreal PBR materials (painted resin, metal, glass, fabric, wood, stone), ray-traced global illumination, soft studio lighting with gentle shadows, realistic reflections, subtle ambient occlusion, high micro-contrast. Camera: very close macro shot, telecentric/low-distortion macro lens look while keeping a clean 45° top-down isometric-like view; focus-stacked macro aesthetic for deep clarity across the diorama (front-to-back sharpness), with only the far background softly blurred. Composition: perfectly centered, symmetrical balance, nothing cropped, square 1080×1080, ultra-clean product-photo presentation. Background: choose a solid flat color that best fits EventName and maximizes text readability (no gradients, no patterns, no environment). Typography overlay: top-center title must be exactly "EventName" (large bold, clean sans-serif). Directly beneath, automatically generate a short neutral subtitle (6–12 words) describing the chosen iconic moment. Below subtitle, automatically place a small simplified official-style icon/pictogram that matches EventName (minimal, monochrome, not an intricate coat of arms). Text and icon must render in pure white or pure black for maximum contrast against the chosen background; keep consistent safe margins

and spacing; no other text anywhere. Avoid: watermark, logo, signature, random letters, extra text, misspellings, UI elements, clutter, gradients, lowres, blurry, noise, artifacts, over-smoothing, plastic look, distorted geometry, duplicated subjects, deformed bodies, realistic faces, facial details, readable text, complex emblems.

6.

INPUT:

BRAND_NAME: Fanta

Create a branded fantasy poster (1080×1080) featuring a majestic castle constructed from BRAND_NAME bottle labels and the brand's packaging materials, with the castle style automatically changing to match the marketing spirit of BRAND_NAME.

AUTO BRAND→CASTLE STYLE (do automatically, no questions):

1) Infer BRAND_NAME's dominant brand personality using Aaker's 5 dimensions: Sincerity / Excitement / Competence / Sophistication / Ruggedness. [web:75][web:127]

2) Convert that personality into a coherent castle architecture style (choose ONE and commit to it):

- Excitement → extreme, playful, high-energy "theme-park fantasy" castle: dynamic silhouettes, bold curves, spirals, energetic shapes, vivid lighting, fizzy atmosphere.

- Ruggedness → fortress / citadel: chunky forms, reinforced buttresses, rugged cliffs, stormy skies, adventurous mood, "outdoors tough" feel.

- Sophistication → elegant Art-Deco / luxury palace: clean symmetry, premium materials, refined ornament, controlled highlights, upscale editorial polish.

- Competence → futuristic techno-castle: precise geometry, engineered structure, clean modular towers, crisp lighting, high-tech vibe.

- Sincerity → storybook fairytale castle: warm, friendly shapes, hand-crafted charm, gentle glow, wholesome magical mood.

3) Automatically pick a matching environment and lighting to amplify the chosen style (one coherent light setup, consistent shadows/reflections). [web:230][web:229]

BRAND LOCK (highest priority, no compromises):

- Preserve the iconic BRAND_NAME logo exactly as in the original: correct spelling, correct typography, correct proportions, crisp edges, fully readable. [web:230]

- Preserve original bottle silhouettes and cap shapes exactly; do not redesign, do not morph the packaging.

- Use the brand's authentic color palette inferred from the logo/labels (do not random recolor); keep color placement consistent across the castle elements. [web:230][web:91]

CASTLE DESIGN (must be made from the brand):

- The castle is crafted entirely from bottle labels, packaging plastics, and translucent brand-colored material:

soda-bottle spires, curved towers wrapped in swirling label ribbons, arches and buttresses from layered label strips,

stained-glass windows formed from translucent brand-colored plastic/glass.

- Place one pristine "hero" label panel on the central tower: flat-to-camera, perfectly readable BRAND_NAME logo, no glare blocking text.

WHIMSICAL ELEMENTS (adapt to style, keep coherent):

- Add brand-colored dragons whose design matches the chosen castle style (cute for Sincerity, sleek for Competence, bold for Excitement, etc.).

- Hot-air soda bubbles floating in depth layers; keep scale consistent and avoid clutter.

CINEMATIC REALISM (poster polish, but coherent):

- Epic composition with strong depth and atmosphere; clean focal path; no chaotic extras.

- Hyper-detailed, glossy materials, realistic micro-textures in labels, controlled highlights, premium color grade.

OUTPUT:

- 1080×1080, sharp, poster-ready, hyper-detailed branded fantasy.

NEGATIVE:

blurry, lowres, noise, jpeg artifacts, watermark, signature, QR code, frame, UI elements,

random text, misspelled text, unreadable logo, distorted typography,

redesigned logo, wrong colors, warped bottle shapes, melted geometry,

duplicate objects, inconsistent shadows, inconsistent reflections, messy composition

INSIDE ELEMENT: Черная жемчужина. Super photorealistic luxury marketing poster (print-ready), extreme macro product photography, ultra close-up. A transparent crystal-clear glass bottle containing a handcrafted miniature diorama of the INSIDE ELEMENT. The bottle is NOT floating: it is lying on its side (horizontal), firmly resting on a picturesque, highly detailed real-world surface and location that visually matches the INSIDE ELEMENT (contextual “lifestyle” scene inspired by it), with obvious ground contact, tiny pressure points, realistic dirt/wetness where it touches, and a physically correct cast shadow and ambient occlusion. Camera extremely close to the bottle, macro lens look, focus stacking feel (razor-sharp droplets and micro-scratches, shallow-to-medium DOF), dramatic premium highlights on glass, accurate refraction and subtle chromatic dispersion, sharp water droplets and condensation. Cinematic lighting consistent with the environment, clean negative space for headline placement (but generate no actual text). Hyperreal photorealism, HDR, crisp textures, commercial advertising quality. --ar 2:3 --raw --stylize 200 --no floating, levitating, hovering, suspension, text, watermark, logo, label, typography, letters, words

8.

кот с сакурой и ирисами — hyper-realistic cinematic macro 3D render of a transparent object filled with delicate spring flowers; minimal clean studio backdrop; soft diffused lighting with gentle reflections; elegant poetic surreal mood; realistic refraction and glass clarity; ultra-detailed botanical textures; high-end product aesthetic; no text, no watermark, no logo.

9.

ДАННЫЕ: спортсмен=Mohammad Ali; соперник=Sonny Liston; момент=Ali stands over the fallen Liston on the boxing canvas right after the first-round knockout, leaning forward and shouting for him to get up, intense victorious emotion; сеттинг=1960s heavyweight title fight, boxing ring canvas and ropes, roaring crowd and bright arena lights; экипировка=classic boxing trunks and boots, boxing gloves, sweat sheen; аксессуары=mini ring-corner stool and towel on the edge (optional), minimal ring ropes, canvas texture and scuff marks; цвета=classic sports photo palette, natural skin tones, neutral canvas colors; формат=1:1.

Сгенерируй премиальную коллекционную мини-фигурку (или мини-диораму) момента из ДАННЫЕ: Ali стоит над лежащим Liston, поза максимально динамичная и “иконичная”, читаемая даже в силуэте; у Ali напряжённые мышцы, наклон вперёд, жест доминирования и триумфа; Liston лежит на спине/боку на канвасе в позе нокаута. Лица упрощённые и стилизованные как скульпт игрушки (не фотореалистичный портрет), но сама фигурка выглядит как дорогая статуэтка/экшен-фигурка: окрашенный resin/PVC, чёткие края, мелкая фактура, высокая детализация перчаток, складок ткани, шнуровки ботинок, потёртостей канваса. Съёмка как продуктовая студийная: чистый нейтральный фон за диорамой, мягкий рассеянный свет + акцент сверху как от аренных прожекторов, лёгкая дымка/хейз (очень умеренно), естественная мягкая тень под фигурками, резкий фокус, высокая чёткость, промо/упаковка коллекционной фигурки. Запреты: без текста, без водяных знаков, без логотипов, без лишних людей,

без лишних предметов, без деформаций, без лишних пальцев/конечностей, без “cartoon 2D”.

ДАННЫЕ: спортсмен=Cristiano Ronaldo; момент=почти горизонтально в воздухе, flying/diving header: корпус вытянут параллельно земле, ноги оторваны от газона, руки слегка разведены для баланса, шея напряжена, взгляд сфокусирован на мяче, кадр застыл в пике движения прямо в момент контакта лбом с мячом; сеттинг=футбольный матч на стадионе, трибуны и прожекторы только как мягкое боке на дальнем фоне; экипировка=современная футбольная форма номер 7 без логотипов и спонсоров, шорты, гетры, бутсы; аксессуары=футбольный мяч в точке удара, 1–2 комка травы/пыльцы в воздухе (очень умеренно); цвета=нейтральная спортивная палитра (белый/чёрный/серый) с одним акцентным цветом; формат=1:1.

Сгенерируй премиальную коллекционную мини-фигурку спортсмена в моменте из ДАННЫЕ: поза максимально читаемая, ощущение “зависания” и скорости, тело почти горизонтально, пик движения (frozen at peak action). Лицо упрощённое и стилизованное как скульпт игрушки (не реалистичный портрет), но сама фигурка выглядит как дорогая статуэтка/экшен-фигурка: окрашенный resin/PVC, чёткие края, мелкая фактура, высокая детализация складок формы, шнуровки бутс, текстуры мяча. Сцена как продуктовая студийная съёмка: чистый нейтральный фон, мягкий рассеянный свет, аккуратная мягкая тень/контактная тень под мини-диорамой, резкий фокус, высокая чёткость, промо/упаковка коллекционной фигурки. Запреты: без текста, без водяных знаков, без логотипов/спонсоров, без лишних людей, без лишних предметов, без деформаций, без лишних пальцев/конечностей, без 2D мульт-стиля.

10.

CITY: Токио в солнечный день

Create a premium, scroll-stopping marketing hero image: a perfectly top-down 90° flat-lay (strict knolling) studio photograph on a clean WHITE seamless background. On top of the white background, place ONE stylish marketing “styling mat / board” (a single base layer under the objects), centered in the frame.

The mat/board must look premium and travel-brand-ready: a modern editorial surface such as ivory suede, warm light marble, terrazzo, linen, or soft-touch coated paper, with subtle embossed details or a tasteful minimal pattern. The mat must be ONE piece only (no multiple sheets), with clean edges, slightly rounded corners, and a gentle drop shadow separating it from the white background. The pattern must be abstract and non-readable (no extra words).

Place ALL objects strictly on the mat (nothing outside it). Arrange everything in a perfect grid-based knolling layout: straight rows and columns, exact right angles, equal spacing, no overlaps, neat margins from the mat edges, lots of intentional negative space. [web:94]

The scene must contain EXACTLY 16 objects TOTAL, and nothing else.

Object list (exactly these, no extras):

- 1) One large title fridge magnet at the top center that reads exactly "CITY" (crisp, legible, correctly spelled).
- 2) One yellow handwritten sticky note to the right of the title with ONE short line showing today's temperature and weather for CITY (readable, correctly spelled).
- 3) Twelve unique 3D souvenir fridge magnets representing different iconic CITY landmarks (each landmark magnet clearly different; no duplicates).
- 4) Two weather-appropriate travel accessories (unique, premium-looking, no duplicates) matching today's weather in CITY.

LOOK & REALISM: The magnets look like real premium travel merchandise (resin/enamel, subtle gloss, crisp edges, micro-texture, realistic contact shadows). Lighting is bright, soft, evenly diffused high-end product photography; clean reflections; sharp focus across the full frame; ad-grade styling.

HARD RULES (to stop repeats/clutter): Show only the 16 objects listed above. Do NOT add any extra magnets, extra landmarks, extra accessories, extra notes, extra stickers, extra decorations, passports, tickets, maps as objects, flags, coins, packaging, hands, confetti, or any additional text. If unsure, leave empty space rather than adding new objects. No duplicates of any kind. No camera tilt, no perspective distortion, no watermark, no logo, no border.
