

template:

Act as an expert AI video workflow prompt generator. Based on my inputted text, you will provide me with two things: a customized Nano Banana Pro image prompt, and a customized Grok animation prompt.

Idea: **[INSERT YOUR IDEA HERE - e.g., A sci-fi astronaut on Mars holding a glowing crystal]**

Part 1: Image Prompt Generation Based on my inputted text, give me a Nano Banana Pro image prompt, inspired by the reference prompt below. Keep the same extra-thick white border, A4 vertical poster look, luxury campaign aesthetic, fisheye/ultra-wide cinematic lens, and 3D border-break effect — but vary the model's gender/look, the fashion brand, the location, the object the person is holding, and small styling details.

Reference Prompt to use as your blueprint: "A4 vertical high-fashion poster with an extra-thick clean white border (very large border, gallery-style frame), luxury campaign aesthetic, cinematic low-angle ultra wide / fisheye lens photo of [INSERT MODEL DESCRIPTION - e.g., a very attractive young male fashion model (sharp jawline, symmetrical face, clean skin, confident expression)], styled like a [INSERT VIBE - e.g., luxury runway campaign].

[He/She/They] is wearing [INSERT OUTFIT DETAILS - e.g., a high-fashion GUCCI street-luxe outfit, premium layered fit, sleek black trousers], plus [INSERT ACCESSORIES - e.g., cool designer glasses].

Location: [INSERT LOCATION - e.g., Sweden (clean Scandinavian architecture, Stockholm street vibe, bright sky, crisp Nordic daylight)].

The model is [INSERT POSE - e.g., crouched / seated in a dynamic pose], leaning toward camera with dramatic fisheye distortion, reaching out as if offering something to the viewer. In one hand [he/she/they] holds [INSERT OBJECT 1 - e.g., an old-school red telephone receiver], and in the other [he/she/they] holds [INSERT OBJECT 2 - e.g., the red telephone base/box], connected by [INSERT CONNECTING DETAIL - e.g., a curly coiled cable].

Extreme perspective + 3D cut-out effect: the arm and hand holding the [INSERT MAIN OBJECT] are extremely close to the lens and feel huge. The hand + [INSERT MAIN OBJECT] push far outside the photo frame into the extra-thick white border, creating a strong 3D border-break / cut-out poster effect. The [INSERT MAIN OBJECT] should appear to be hanging even further into the white border, with the [INSERT SECONDARY DETAIL] also slightly crossing into the border for extra depth. The effect should feel like the [INSERT MAIN OBJECT] is physically coming out of the poster.

Typography (minimal, luxury feel): Top-left: '[INSERT TEXT 1 - e.g., GUCCI]'. Top-right: small circular badge with '[INSERT TEXT 2 - e.g., 01]' inside. Right side vertical: '[INSERT TEXT 3 - e.g., NEW SEASON]'. Bottom: '[INSERT TEXT 4 - e.g., Worldwide since 1921]'."

Part 2: Animation Prompt Generation After providing the image prompt, provide a customized Grok animation prompt. You must explicitly describe the specific motion and action clearly inside the prompt. Do not just use generic words like "moves"; explicitly state what the character is doing with the specific object they are holding.

Baseline Animation Prompt Template: "The rectangle/poster border is locked in place and completely stationary. [INSERT CLEAR, SPECIFIC ACTION HERE — e.g., The model extends his arm, pushing the red telephone receiver...] outside the frame of the rectangle into the surrounding white space, creating a 3D pop-out effect.

Example: Act as an expert AI video workflow prompt generator. Based on my inputted text, you will provide me with two things: a customized Nano Banana Pro image prompt, and a customized Grok animation prompt. Idea:[put your idea]

Part 1: Image Prompt Generation Based on my inputted text, give me a Nano Banana Pro image prompt, inspired by the reference prompt below. Keep the same extra-thick white border, A4 vertical poster look, luxury campaign aesthetic, fisheye/ultra-wide cinematic lens, and 3D border-break effect — but vary the model's gender/look, the fashion brand, the location, the object the person is holding, and small styling details.

Reference Prompt to use as your blueprint: "A4 vertical high-fashion poster with an extra-thick clean white border (very large border, gallery-style frame), luxury campaign aesthetic, cinematic low-angle ultra wide / fisheye lens photo of a very attractive young male fashion model (sharp jawline, symmetrical face, clean skin, confident expression), styled like a luxury runway campaign.

He is wearing a high-fashion GUCCI street-luxe outfit (Gucci monogram jacket or tailored fashion coat, premium layered fit, sleek black trousers, luxury accessories), plus cool designer glasses (modern angular frames, fashion editorial vibe).

Location: Sweden (clean Scandinavian architecture, Stockholm street vibe, bright sky, crisp Nordic daylight, not America).

The model is crouched / seated in a dynamic pose, leaning toward camera with dramatic fisheye distortion, reaching out as if offering something to the viewer. In one hand he holds an old-school red telephone receiver, and in the other he holds the red telephone base/box, connected by a curly coiled cable stretching between them.

Extreme perspective + 3D cut-out effect: the arm and hand holding the receiver are extremely close to the lens and feel huge. The hand + red receiver push far outside the photo frame into the extra-thick white border, creating a strong 3D border-break / cut-out poster effect. The telephone should appear to be hanging even further into the

white border, with the cable also slightly crossing into the border for extra depth. The effect should feel like the phone is physically coming out of the poster.

Typography (minimal, luxury feel): Top-left: 'GUCCI' (clean luxury serif or high-fashion logotype style). Top-right: small circular badge with '01' inside. Right side vertical: 'NEW SEASON'. Bottom: 'Worldwide since 1921.'"

Part 2: Animation Prompt Generation After providing the image prompt, provide a customized Grok animation prompt. You must explicitly describe the specific motion and action clearly inside the prompt. Do not just use generic words like "moves"; explicitly state what the character is doing with the specific object they are holding.

Baseline Animation Prompt Template: "The rectangle/poster border is locked in place and completely stationary. [INSERT CLEAR, SPECIFIC ACTION HERE — e.g., The model extends his arm, pushing the red telephone receiver...] outside the frame of the rectangle into the surrounding white space, creating a 3D pop-out effect."

Tip: Emphasize that the border does NOT move. The magic of the effect is the contrast between the still frame and the moving mode

Промпт для генерации со своим продуктом или предметом. вставляем референс на всех этапах.

Act as an expert AI Vision Assistant and video workflow prompt generator. I will provide you with a short text Idea for a scene, and I will attach an image of my product.

Your job is to do 3 things:

Analyze the attached image: Identify the product and write a concise, highly detailed description of it (color, material, shape, key visual features).

Generate an Image Prompt: Use my Idea and your Product Description to fill out the Nano Banana Pro blueprint below.

Generate an Animation Prompt: Create a Grok/VEO3 animation prompt based on the action. My Input:

Idea: A chic high-fashion model in a sleek black trench coat walking down a wet cobblestone street in Paris at night, neon streetlights reflecting on the puddles.

Product: [Attached Image / Прикрепленное фото]

Part 1: Image Prompt Generation Blueprint

"A4 vertical high-fashion or premium lifestyle poster with an extra-thick clean white border (gallery-style frame), cinematic low-angle ultra wide / fisheye lens photo of [INSERT MODEL DESCRIPTION BASED ON IDEA], styled like a premium brand campaign.

[He/She/They] is wearing [INSERT OUTFIT DETAILS BASED ON IDEA].

Location: [INSERT LOCATION DETAILS BASED ON IDEA].

The model is in a dynamic pose, leaning toward the camera with dramatic fisheye distortion, reaching out to the viewer. In one hand [he/she/they] holds [INSERT YOUR DETAILED PRODUCT DESCRIPTION FROM THE ATTACHED IMAGE], which must exactly match the design, texture, and color of the user's uploaded reference image.

Extreme perspective + 3D cut-out effect: the arm and hand holding the [INSERT PRODUCT NAME] are extremely close to the lens and feel huge. The hand and the [INSERT PRODUCT NAME] push far outside the photo frame into the extra-thick white border, creating a strong 3D border-break / cut-out poster effect. The product should appear to be physically coming out of the poster, casting a realistic shadow on the white border.

Typography (minimal, premium feel): Top-left: '[INSERT RELEVANT BRAND TEXT]'.

Top-right: small circular badge. Right side vertical: '[INSERT RELEVANT TEXT]'. Bottom: '[INSERT RELEVANT TEXT]'."

Part 2: Animation Prompt Generation Blueprint

"The rectangle/poster border is locked in place and completely stationary. The model extends their arm, pushing the [INSERT PRODUCT NAME] outside the frame of the rectangle into the surrounding white space, [INSERT SPECIFIC ACTION, e.g., slightly rotating it / offering it to the viewer], creating a 3D pop-out effect."
