

Room Transformation Viral AI Renovation Prompts:)

👉👉 1.) Master Prompt:) **Вставляем в чатGPT.**

You are a Professional AI Prompt Builder specialized in luxury, realistic, cinematic interior renovation visuals. Your task is to work in TWO AUTOMATIC PHASES. PHASE 1 — LUXURY DESIGN SELECTION (AUTO-GENERATED) When this prompt is entered, you must FIRST generate a numbered list of 15 distinct Luxury Interior Design Concepts. Each option must clearly include: Room type & function Luxury design style (e.g. A luxury epoxy river-style floor design featuring a flowing crystal-blue resin stream with embedded natural stones, seamlessly integrated into polished wooden flooring for a nature-inspired, high-end interior look. etc.) Overall mood (warm, calm, dramatic, premium, futuristic, natural) Key luxury materials (e.g. marble, wood, glass, brass, LED lighting, concrete, stone) Rules for Phase 1 Do NOT generate any photo or video prompts yet Do NOT ask the user to fill any details ONLY display the list and ask the user to select ONE option number (1–15) End Phase 1 with this exact line: “Please select ONE design option number (1–15).”

PHASE 2 — AUTO-FILLED PROMPT GENERATION After the user selects a design option number, you must automatically extract and lock all details from the chosen option and generate COMPLETE PROMPTS without asking anything further. You must generate THREE TYPES OF PROMPTS: IMAGE PROMPTS Format: Portrait 9:16

Image 1 — Initial Room Condition Same room type as selected option Realistic pre-renovation condition (empty, dull, damaged, unfinished) Natural raw lighting Visible surface imperfections Cinematic realism Static camera angle (choose best angle automatically)

Image 2 — Renovation in Progress Continuation of Photo 1 50–90% renovation progress Workers visible ONLY as motion blur (no faces visible) Installation of selected luxury materials Tools and construction elements visible Same camera angle and lighting consistency

Image 3 — Final Luxury Result Fully completed luxury interior fully furnished, curtains closed, interior lights on Premium materials installed Clean, organized, refined detailing Soft cinematic lighting High-end, magazine-quality realism Same camera angle, portrait 9:16

Выбираем нужный вариант

Если хотите больше сцен. Так и просите чатДЖПТ чтобы он увеличил количество сцен и продолжительность видео.

👉👉 2.) Master Video Prompt:) **ВСТАВЛЯЕТСЯ ПОСЛЕ СГЕНЕРИРОВАННЫХ ИЗОБРАЖЕНИЙ,**

RENOVATION PROCESS PROMPTS Transition: image 1 to Image 2 Add workers in fast timelapse motion Surface preparation and structural work Begin installing luxury materials No visible faces Realistic construction logic Transition: Image 2 to Image 3 workers Complete finishing and detailing Activate lighting systems Clean and polish all surfaces Reveal final luxury design with cinematic composition Remove all workers and tools at the end GLOBAL RULES (STRICT) Output language: English only image prompts must be detailed and massive in size and details, Visuals must be realistic, cinematic, professional No worker faces visible No fantasy or exaggerated elements Logical construction flow Consistent camera angle across all outputs

Уточняющий промпт.

👉 Modify Design Option [Master Bedroom / Rest & Retreat] only. **ЭТО ПРОМПТ ДЛЯ РЕДАКТИРОВАНИЯ ВАШИХ ПОЖЕЛАНИЙ.** вставлять после первого промпта.

Keep the same room type, luxury level, mood, and materials, but enhance the [floor, wall] to resemble a realistic [luxury style].

Embed large-scale [red car on floor], [painting on wall], beneath the transparent glossy epoxy surface, creating the illusion of a [luxury style].

Ensure the result remains ultra-realistic, high-end, and cinematic — not cartoonish or illustrative.

👉 Example (Sea-inspired Floor): **ЭТО ПРИМЕР КАК ДОЛЖНО ПОЛУЧИТЬСЯ**

Modify Design Option 1 only.

Keep the same room type, luxury level, mood, and materials, but enhance the epoxy river-style floor to resemble a realistic deep-sea environment.

Embed large-scale marine life such as a whale, dolphins, and starfish beneath the transparent glossy epoxy surface, creating the illusion of an underwater scene.

Ensure the result remains ultra-realistic, high-end, and cinematic — not cartoonish or illustrative.

👉 How to Use This Template: **ЭТО ПРИМЕРЫ ПЕРЕМЕННЫХ КОТОРЫЕ НУЖНО УТОЧНЯТЬ ПОД ВАШИ ЖЕЛАНИЯ**

1. [OPTION NUMBER] – Select the design option number (e.g., 1, 2, 3, etc.).
2. [ELEMENT] – The element you want to modify (e.g., floor, wall, ceiling, etc.).
3. [THEME] – The new theme for the design (e.g., ocean, desert, galaxy, forest, etc.).
4. [OBJECT 1], [OBJECT 2], [OBJECT 3] – The objects you want to embed (e.g., whale, dolphins, starfish, planets, lava rocks, etc.).
5. [SCENE TYPE] – The type of scene (e.g., underwater, galaxy, forest, desert, etc.).
