

Female Ninja Fighting Multiple Ninjas

(Attached Start & End Frames)

These are the opening and closing scenes of a swordfight. Based on these two scenes, create a seamless sequence of a female ninja in a costume fighting multiple ninjas. Use multiple angles and perspectives to create a more cinematic feel. The fight is intense and high-action. LEGEND: Cyan = Subject, Red = Action/Physics, Green = Camera Movement, Pink = Style, Gray = Audio/Constraints (Leave Default)

Two Fighter Women

(Attached Grid Image)

Referencing the nine-panel grid image, cover all shots from left to right and top to bottom. Make the final video seamlessly continuous.

0-2s / Shot 1: [Establishing Shot] The camera slowly pans right, showing Blue Girl and Red Girl standing opposite each other, with cherry blossom petals falling. Use a Dolly Zoom to enhance the sense of spatial compression and tension of an impending showdown.

2-3s / Shot 2: [Flash Cut] The camera rapidly pushes in to a tight close-up of Blue Girl's face, capturing her intensely glaring at Red Girl. Her expression is fierce, accompanied by the visible rise and fall of her chest with each breath.

3-4s / Shot 3: [Close-up] The camera switches to Red Girl, who opens her folding fan to cover half her face. Use side-tracking to follow the flowing of her ponytail in the wind, with cherry blossom petals drifting across the foreground.

4-6s / Shot 4: [Tracking Shot] Blue Girl launches a high roundhouse kick. The camera moves with her leg, simulating the visual impact of extreme speed, highlighting the muscle lines of the leg and the texture of her stockings.

6-7s / Shot 5: [Whip Pan] The camera whips quickly toward Red Girl. She steps back to evade the attack, simultaneously throwing a powerful punch forward.

7-9s / Shot 6: [Extreme Close-up] The camera focuses tightly on the collision point between Blue Girl's fist and the folding fan. Sparks fly everywhere. Apply camera shake to simulate the authentic force of the physical impact.

9-11s / Shot 7: [Orbiting] Both girls are blown backward by the force, spinning back. The camera orbits 180° around her center at high speed, using dynamic motion blur to emphasize the intense impact.

11-13s / Shot 8: [POV] Switch to Blue Girl's point of view: she sees Red Girl flying backward, crashing heavily onto the ground, shattering it into pieces. Debris flies everywhere, with thick dust billowing up.

13-15s / Shot 9: [Pull Back] Both characters land and slide backward. The camera quickly pulls back, showing the two standing far apart, sliding through the air. Lighting gradually stabilizes, freezing on a tense, ready-to-strike pose.

Overall Style Requirements: 3D realistic cinematic animation, physically accurate cloth simulation and light-shadow interactions. Emphasize a strong sense of weight and visual impact. Audio: Add dynamic sound effects of wind, fabric tearing, and heavy impacts corresponding to the actions.

Transformers

[0-2 seconds] One-take, the camera follows closely throughout. The scene begins on the banks of the Seine in Paris (Image 2), with buildings collapsing, thick smoke, water currents roaring, and the Eiffel Tower faintly visible in the smoke.

[2-5 seconds] A male pilot in a white suit (Image 3) perilously straddles a giant mechanical structure. The camera zooms out, revealing he is riding a transforming fighter jet. The action is tense and exciting, with his coat tails violently flapping in the airflow as he tightly grips the mecha's components.

[5-7 seconds] The fighter jet (referencing Image 2, front view of a twin-engine fighter) speeds close to the Paris street level, its body structure undergoing complex mechanical reconfiguration. The wings fold back, engines reorganize into the core power of a humanoid mecha, the fuselage extending to form sturdy metal skeletons and glowing pipelines. The pilot navigates perilously in the core power area, dodging the reassembling cockpit.

[7-9 seconds] Transformation complete, the giant mechanical behemoth stands in the Paris streets, retaining the jet's tail wings and propeller features. The camera stays close as it moves through Haussmann-style buildings. The machine raises its head, its back armor unfolds, revealing a giant cannon barrel, with energy accumulating in the core. A devastating energy beam is released with a roar, and distant landmarks crumble into smoke.

[9-10 seconds] The pilot climbs into the cockpit. The mecha takes humanoid form, engines ignite at full power, twin exhaust flames are intensely orange-red, and the machine flies up into the clouds, the outline of Paris rapidly shrinking below. Close-up of the pilot in the cockpit: short hair, wearing a high-tech tactical helmet, resolute expression.

The camera passes through the clouds and cuts to low altitude over Paris. A colossal bipedal mecha (Image 2, the original car's silhouette) rises between the Haussmann-style buildings on both sides—the fighter jet has completed its transformation, towering like a mountain. The Eiffel Tower is clearly visible in the background.

Shot 1: Power Reconfiguration: Rear Fission (0-4s)

Action: Close-up tracking shot. A dusty muscle car drastically accelerates, rear end splitting apart, expanding into gigantic hydraulic mechanical legs. The rear bumper shatters, revealing glowing thrusters. The legs slam onto the bridge deck, crushing the asphalt with a massive shockwave. Sparks fly from the metal joints under immense friction. High-frequency vibration. 8K photorealistic.

Shot 2: Torso Expansion: Steel Spine (4-8s)

Action: Low-angle tracking up. The car's roof and hood fold and stack into a massive mechanical torso and shoulder armor. The engine block forcefully shifts to the chest, exposing a glowing power core. The titan stands nearly 15 meters tall, the entire frame unfolding, accompanied by a loud mechanical clank. Handheld shaky cam, low angle looking up to enhance the towering, crushing scale.

Shot 3: Frontal Armament: Chest Cannon Bay (8-12s)

Action: Extreme close-up on the chest armor plates. The heavy plating slides open in a complex clockwork sequence, revealing a colossal kinetic energy cannon nested in the torso. Energy conduits light up rapidly with blinding blue light. The air begins to shimmer from intense thermal energy. The camera shakes violently from the energy buildup.

Shot 4: Ultimate Judgment: Devastating Strike (12-15s)

Action: The cannon fires a devastating, blinding cyan energy beam. The recoil from the massive blast forces the steel titan to dig its metal claws into the bridge. The beam pierces the bridge deck, causing it to collapse in a catastrophic, fiery explosion. A shockwave ripples through the air, shattering everything in its path. Cinematic wide shot, slow-motion, epic apocalyptic aesthetic.

9:16 vertical smartphone filming perspective

9:16 vertical smartphone filming perspective, realistic bystander live-recording footage, subtle handheld shake, dynamic tracking, high-quality amateur aesthetic, environmental audio capture, distant city skyline clearly visible.

An airport runway situated near the city center, with a backdrop of a clear blue sky and distant high-rise buildings. A large twin-engine wide-body passenger jet is in the process of a high-speed landing, landing gear deployed, engines producing a thunderous roar.

Just before touchdown, the aircraft's fuselage begins mechanical structural reconfiguration—wings folding inward, engines shifting downwards, panels sliding open to reveal complex metal components aligning with precision, hydraulic systems hissing and venting steam, the entire structure reconstructing at high velocity.

The process is a smooth and fluid fluid-like mechanical transformation animation, realistic metal textures, pronounced sense of mass and weight, cinematic lighting casting dynamic shadows on the fuselage.

The aircraft completes its transformation into a colossal metal behemoth, its massive feet heavily impacting the runway, sending gravel flying and shockwaves radiating outward.

The robot then charges into the city at high speed, its footsteps shaking the ground, stepping on vehicles, tearing up the asphalt, overturning vehicles through vibration, shattering building windows, leaving a trail of destruction in its wake.

Ultra-photorealistic cinematic-grade imagery, realistic physics engine simulation of gravity, detailed light and shadow, particle effects, and awe-inspiring explosion visuals.

Overall style strictly maintains a "genuine smartphone recording" visual language, avoiding cinematic visual effects and IMAX-grade detail.

A 10-second dynamic video shows an excavator is transforming on the spot.

A 10-second dynamic video shows an excavator is transforming on the spot. The metallic body parts smoothly separate, rotate, and reassemble, transforming into a tall and handsome humanoid mecha. Featuring a sci-fi mechanical structure with cinematic lighting and texture, the 4K ultra-high-definition video is accompanied by a rotating mechanical gear, metal folding, and sci-fi transformation sound effects, creating a strong sense of rhythm.

A 10-second dynamic video shows a modern sports car transforming on the spot. The metallic body parts smoothly separate, rotate, and reassemble, transforming into a tall and handsome humanoid mecha. Featuring a sci-fi mechanical structure with cinematic lighting and texture, the 4K ultra-high-definition video is accompanied by a rotating mechanical gear, metal folding, and sci-fi transformation sound effects, creating a strong sense of rhythm.

Human Body Transformations

SHOT 1 — 0:00-0:02 (2s)

Wide overhead shot in sterile cryo-lab. A fully human-looking female subject (Reference Image 1) lies horizontally in a translucent diagnostic pod, subtle chest breathing, soft ambient lights. Transformation begins: skin on arms and legs rapidly retracts, revealing complex bio-mechanical muscle fibers. The skin dissolves/peeling like frost in fast motion, peeling in translucent layers to expose glowing cyan circuitry underneath.

Dramatic high-contrast cool lighting, quick reveal, cinematic quality.

SHOT 2 — 0:02-0:04 (2s)

Medium close-up tracking upward. Exposed titanium skeleton emerges. Torso, shoulders, and lower back drastically contract, carbon fiber plating sliding to fit over joints. Inner core arcs, reconfigure in quick choreographed spins, upgraded parts snap into place with metallic clacks. The metal parts reflect ambient blue light, dynamic motion, sci-fi lab vibe, ultra-detailed mechanics.

SHOT 3 — 0:04-0:07 (3s)

Close-up on head/shoulders with fast push-in. Cranial panels slide open to fit neural connectors. Human face and eyes fully articulate, deep blue eyes darting frantically before locking open. Glowing sections. Pale blue-gray irises flicker digitally under eyelids. Quick synthetic skin begins covering metallic face structure in patches.

SHOT 4 — 0:07-0:09 (2s)

Full-body medium shot, slight orbit. Subject steps out of the pod. Cybernetic body fully formed. deliberate cybernetic accents: glowing neck lines, faint circuit tattoos around her eyes. Subject shakes her head, adjusting to new form. Fast seamless fusion, volumetric god rays, futuristic atmosphere.

SHOT 5 — 0:09-0:12 (3s)

Medium shot. Futuristic dark tactical uniform materializes over form like smart-fabric flowing down, latching to the new body structure in quick, fluid sequences. Soft dramatic glowing details. Human expression forms. Clean neon-accented lighting, sharp textures.

SHOT 6 — 0:12-0:15 (3s)

Wide cinematic shot. Lab door slides open with hiss, intense backlit volumetric lighting spilling in. The subject walks forward with confident stride, head tilts curiously, eyes lock on camera with bittersweet smile. Fully human expression, slight glow to eyes, synthetic skin fully closed. Dolly zoom out slightly, emotional cybernetic reveal, ultra-realistic.

Generate a henshin transformation video for me:

Generate a henshin transformation video for me:

Character features: beautiful face -- DO NOT change facial features, shape, or do any beautification/face-lifting at all.

Attire: White long dress.

Scene: Outdoor, massive ruined city, devastated and desolate, overcast sky, visually oppressive and heavy atmosphere, strong biotech + alien technology feeling.

Attire:

Black leather trench coat + black shirt

Hair: Black hair, short hair, bangs (no exposed forehead)

Expression: Gloomy, calm and restrained expression

Waist belt:

Silver and blue futuristic alien sci-fi energy core, no toy/plastic feeling, fully organic-mechanical look.

Scene:

Overcast outdoor open space, gray-blue gloomy sky, noticeable wind blowing

Cinematography:

Medium close-up shot -> close-up shot

Start from approximately 30° side angle

Slightly shaky handheld camera feel, gentle push-in

Single continuous shot, NO cuts throughout the entire video

Action sequence:

1. Head slightly lowered

2. Slowly raise head
3. Slowly move BOTH hands to the belt
4. Speak in a low, deep voice:
"Henshin"
Transformation process:
Transformation style: Swirling black mist + black particles surrounding the body + dark energy fluctuations spreading outward.
NO piece-by-piece assembly, no instant flash change — slow and organic growth process.
Special effects:
Eyes emitting intense red energy intertwining
Low-frequency mechanical droning sound
Ending shot:
Exactly as shown in Image 2, living organism growth texture
Biotech insect-like compound eyes, strong alien feeling
Ending shot:
Half-body, horizontal close-up, hold still for 3 seconds
Only wind sound + cold, oppressive, intimidating atmosphere

First-person POV, ultra-hyper-realistic

First-person POV, ultra-hyper-realistic cinematic sequence, 8K.

Foreground: a hand holding a modern minimalist Bluetooth speaker.

Background: an attractive young woman in 2020s corporate fashion, wearing a beige oversized blazer and wide-leg trousers, is waiting.

The hand opens and the speaker violently disintegrates into glowing neon-blue acoustic vapor and floating musical notes.

The neon vapor aggressively sinks into the skin.

The hand morphs into a retro, glossy vinyl-record textures with glowing vibrating soundwaves pulsing beneath the skin.

Both vinyl hands thrust forward.

A deafening shockwave of glowing retro music notes hits the woman.

Her modern clothes violently ripple and disintegrate into digital dust, instantaneously stitching together in a flash into a vibrant 1950s pink poodle skirt, fitted cardigan, and classic saddle shoes.

Masterpiece VFX transition

Prompt Structure

1. Camera / Perspective Setup
[First-person POV / third-person / ultra-realistic cinematic sequence, 8K...]

Foreground: [hand / hands holding object]

Background: [describe location, lighting, and what target person is doing / standing / reading]

2. Held Object Introduction

The object is [describe shape / size / general / theme] object.

The object has [material / texture / glow / color / design details].

3. Object Disintegration

The hand opens and the [object name] [violently / magically / playfully] disintegrates into [energy form] -- for example: glowing vapor, floating dust, digital code, petals, stardust, musical notes, geometric shards, water droplets...

The energy [swirls / vibrates / expands / sinks into the skin / wraps around the arm].

4. FPV Hand Transformation

The hand[s] [rapidly/slowly] morph into [new material / themed form] -- for example: molten lava, glowing crystal, robotic plating, cosmic light, flowers, smoke, ice, neon circuitry...

Details: [describe the texture, colors, glowing elements, veins / patterns].

5. Forward Action / Attack / Release

Both [new material] hands thrust [forward / open outward / clap / point / snap].

A localized [blast / wave / pulse / burst / shockwave / beam] of [energy form from step 3] erupts toward the target.

6. Impact on Target

The [energy] hits the target.

7. Target Transformation / Disintegration

Her [clothes / body / style / silhouette / hair / accessories / entire look] violently / elegantly / magically [ripple / dissolve / fragment / shatter / burst into flames / turn to water / shift / morph]

...into [energy form / intermediate state]

The particles instantaneously stitch together / reassemble / bloom into [new theme / era / character / outfit / material / look]

Describe the final look in detail: [colors], [silhouette], [signature elements of the new theme -- e.g. 1950s skirt, cyberpunk armor, fantasy gown].

The target [strikes a pose / looks towards camera / walks forward / reacts in shock / environment also transforms].

Style: Hollywood haute couture fantasy blockbuster

Style: Hollywood haute couture fantasy blockbuster, 8K ultra-HD, photorealistic, cinematic lighting, editorial photography style, Unreal Engine 5 fluid rendering, visual illusion.

Scene: A vast, real "sky mirror" salt lake stretching endlessly into the horizon. The sky is an intense, clear cerulean blue, while the ground reflects everything like a perfect mirror. The border between sky and earth is indistinguishable. Shot 1: Haute couture entrance and porcelain skin

Action: The camera tracks low across the mirror-like ground, pushing in with a super telephoto lens.

Subject: A striking Asian female model with striking, high-fashion features walks across the water with a cold, elegant runway stride.

Details: She wears an impossibly structured, avant-garde gown made of entirely delicate porcelain and deep blue velvet. Every step she takes, the hem emits crisp ceramic collision sounds, shimmering with translucent textures. Intricate, deep blue floral patterns crawl across the white porcelain-textured dress like living creatures. Shot 2: Supernatural transformation and porcelain shatter

Camera: Extreme close-up on her face, then a rapid focus-pulled shot.

Action: The model suddenly stops, stares coldly into the camera, and snaps her fingers sharply.

Effects: The instant the snap sounds, her blue-and-white porcelain gown shatters violently into millions of razor-sharp shards. The shards don't fall; instead, they defy gravity, transforming into liquid droplets of water and traces of ink. they streak through the air with elegant, sweeping trails, swirling around her like a storm. Shot 3: Dimensional dissolution and abyssal reflection

Camera: High aerial top-down shot, rapidly spinning as it descends.

Action: The form of the woman gradually dissolves deep into the mirror-like lake, merging into a massive swirling vortex of black ink.

Effects: The once-solid salt-lake surface instantly loses its surface tension, and the entire world—sky, clouds, and light—begins to dissolve like thick ink dropped into clear water. The storm clouds and the model's form are completely swallowed by the dark hole, pulling the camera completely into a black-and-white abyss.

A stunning mermaid bursts upward

A stunning mermaid bursts upward from the ocean at high speed, water exploding around her in slow motion. As she rises into the air, the camera begins an orbiting move around her. Her shimmering scales glow in the sunlight while her body twists gracefully. Mid-air, she transforms seamlessly into a same-size dragonfly — wings unfolding, iridescent and hyper-detailed. The transformation is fluid and dramatic, Hollywood-style. The camera completes its orbit as the newly formed dragonfly catches the light, then darts away into the sky with elegant speed. Ultra-realistic, breathtaking, highly detailed, cinematic lighting, dramatic atmosphere.

A lone astronaut in a standard spacesuit

A lone astronaut in a standard spacesuit lands on a frozen exoplanet covered in endless glaciers under a dim blue sun.

Slow cinematic shot: he removes his helmet, cold vapor fills the air, his skin gradually turns translucent and crystalline, veins glow icy blue, body develops thick insulating blubber and frost-like scales, eyes become multifaceted like ice crystals, until he becomes a graceful ice-adapted humanoid gliding across the surface.

Ultra-realistic, slow transformation, dramatic lighting.

POV Dragon Rider

Create an ultra-realistic video from a first-person camera perspective. The viewer is riding on the back of a massive, powerful dragon flying above an ancient city under siege. In the foreground, the rider's armored hands are clearly visible, gripping the rough scaled neck or reins of dragon tightly. A wings stretch out ymt to either side, casting shadows over the burning city.

You're the dragon pilot

You're the dragon pilot and this is your point of view while you're blasting orcs

Bullet Time/Near Freeze Time

Theme: Background objects (vehicles, lights, falling leaves) are completely frozen, while the main character remains active.

Core Transition: The moment the music starts, the real world enters a "frozen" state.

00:00 - 00:02 Real-life Interaction (Close-up)

Shot Description: A foot in stylish footwear gracefully steps down on a flat surface.

Scene Details: A leg wrapped in black stockings steps down, with a black stiletto pressing heavily on the toe of a white sports shoe. This action serves as the physical trigger signal for the "time pause."

Atmosphere: Authentic street ambiance, the white shoe implies a male presence.

00:02 - 00:04 Character Entrance (Medium Shot)

Shot Description: The camera slowly pans up.

Scene Details: The girl wears a gray fitted cropped hoodie, playfully glances at the camera, then turns to run away, her high heels clicking on the pavement in a clear, rhythmic sound.

At this point, the white car in the background and distant streetlights still maintain normal dynamics.

Atmosphere: The interaction with the protagonist's gaze carrying a hint of playful scrutiny.

00:04 - 00:06 Audio Cue (Close-up)

Shot Description: POV from holding the phone.

Scene Details: The screen displays the playback interface for "Sweet Dreams", pressing play starts the audio.

Atmosphere: Pivotal turning point. As the first electronic synthesizer sound hits, time begins to slow down, entering the bullet time space.

00:06 - 00:12 Freeze Time on the Street (Wide/Medium Shot)

Shot Description: The camera follows the girl running.

Scene Details: Heavy trucks and white sedans on the road are completely frozen in motion. Even the dust kicked up by tires hangs suspended in the air.

Subject: The girl is completely unbothered, running towards the camera. The visual flow follows a slow follow mode, naturally lifting from the phone to sweep across the street before returning to focus on her figure.

Atmosphere: Time freeze, dynamic impact.

00:12 - 00:15 Protagonist's Action

Shot Description: Extreme close-up tracking on the face.

Scene Details: The girl runs forward at a steady pace, looking back into the camera. Suddenly, a hand (representing the protagonist unaffected by time) reaches into the frame and playfully pinches her cheek. The girl's eyes widen slightly, an expression hovers between a slight startled "caught" surprise and playfulness.

Cinematic shot of two Formula 1 race cars

Cinematic shot of two Formula 1 race cars, one lime green and one white, racing neck-and-neck on a rain-soaked track. As they speed toward the finish line, the video transitions into a bullet-time effect: time slows to a near-freeze, suspending water droplets and tire spray in mid-air. The camera smoothly trucks backward and upward, shifting from a low rear view to a top-down bird's-eye view as the cars cross the checkered line, before time resumes normal speed and the cars zoom away.

Multishot

1. open with an establishing fly over shot of a misty jungle in the early morning, a soldier (the woman from the image) is in a chopper in army uniform, she says "We're entering foh-fur country now. This is latent space, anything could happen"
 2. cut to a chopper landing in a field, lots of people rushing out, holding their hair and hats
 3. cut to her again, "No time for a briefing" she says, "we're going straight out to the site"
 4. short clip of them all riding 4x4s through rugged jungle terrain
 5. they reach an enormous towering object, mysterious, it reaches into the sky, made of obsidian, she says "Welcome to the foffer"
 6. a title screen shows "FOFR"
- Give the whole scene an action adventure vibe. Desaturated, cold, powerful. Deep reverberating bass throughout.

two people in a cafe

1. two people in a cafe, one says, "did you ever see that foh-fur movie?", the other: "Yeah, I remember it well..".
2. cuts to a dark sci-fi night, establishing shot of a modern city in heavy rain, a film noir voiceover says "It was a dark night".
3. A white classic muscle car is driving through the rain at speed, being chased by police drones.
4. cut to the passenger in the car, they look at the sleek driver, "damn, you can drive!", driver changes gear, kicks up the acceleration.
5. cut to an overhead view of the muscle car speeding away, drones following.
6. back to the cafe, first person says: "Such a good movie".

RACE SEQUENCE

RACE SEQUENCE

presented in rapid cinematic coverage with dynamic angles and intense motion energy

-- QUICK CUTS

-- BEAT SYNC HARD EDIT FORMAT: 15s / 120 BPM / 12 SHOTS / HARD CUT

Using Image 1 as a reference

Using Image 1 as a reference, generate a 15-second multi-camera video scene: starting with a wide-angle shot of the mansion's exterior, guests are entering the house, then the scene switches to the ballroom, where a couple is dancing in the center of the room, and then to the ballroom bar area, where a bartender is shaking drinks, employing a fast-paced editing style similar to music videos

Single Take Shot

SCENE: Street cafe tables transitioning through time - DAY TO NIGHT

Single Take Tracking Shot

OVERALL VIBE: A seamless visual blend of primal history and hyper-futuristic evolution. The air shifts from woodsmoke to the crisp ozone of synthetic energy, with audio crossfading from chanting to synth-wave. The camera work is relentlessly smooth, maintaining a locked-on center point.

SHOT DESCRIPTION:

0:00-0:02 (Continuous Tracking): A tracking shot glides over outdoor gathering spaces along a path showing the evolution of community spaces. The camera tracks forward smoothly, revealing snapshot micro-stories from 6 eras, culminating on a levitating futuristic vessel.

TIMELINE/SHOT-BY-SHOT

0:00-0:02 [Low Angle Tracking] (35mm): The camera rushes over a rough stone slab. A Neanderthal male in furs violently strikes flint, sparking a small fire. He stares intensely at the flame. The background is a dense, misty forest. The air is filled with thick, unfiltered smoke.

Colors: Earthy tones, bright orange sparks, muted greens.

SFX: Grunts, harsh scraping of flint, crackling fire.

0:02-0:04 [Continuous Tracking]: The camera sweeps over a polished marble table. A Roman senator in a white toga debates animatedly with an unseen companion, gesturing with a silver goblet of wine. Sunlight streams through colonnades.

Colors: Bright whites, rich golds, deep reds.

SFX: Echoing voices, clinking metal, bustling city square.

0:04-0:06 [Continuous Tracking]: The camera glides past a rustic wooden table. A Victorian gentleman in a top hat reads a broadsheet, a brass espresso machine hisses.

Colors: Sepia tones, rich browns, brass highlights.

SFX: Hissing steam, rustling paper, distant horse hooves.

0:07-0:10 [Continuous Tracking]: The camera sweeps over a 1950s chrome diner table. A young woman in a polka dot dress sips a cherry cola, neon light reflects off the polished surface.

Colors: Pastel pinks, bright reds, chrome reflections.

SFX: Upbeat jukebox music, clinking glass, distant traffic.

0:10-0:12 [Continuous Tracking]: The camera passes a sleek minimalist table in the 2020s. A couple in sharp business attire silently tap on glowing tablets, city lights blurring past the window.

Colors: Cool blues, crisp whites, sharp neon accents.

SFX: Soft electronic hum, tapping screens, low traffic hum.

0:12-0:15 [Deceleration to Close-Up]: The camera slows aggressively, centering on a futuristic levitating vessel bathed in neon purple light. A pulsating ceramic cup spins, releasing glowing pink energy vapor into a dark sci-fi metropolis.

Colors: Neon purples, bright pinks, deep blacks.

SFX: Soft magnetic hum, crystalline shimmers.

TECHNICAL & RENDER:

Camera: Weighted dolly track, perfectly smooth with physical momentum.

Lenses: Sharp cinematic primes, pulling deep depth of field to isolate each era.

Lighting: Dynamic era-specific lighting, transitioning from warm firelight to cold neon.

Render: Hyper-realistic physically based rendering, ray-traced lighting, highly detailed, raw footage, motion picture, 8k resolution, volumetric rendering.

SOUND LAYERS:

Era-specific soundscapes transitioning into a cohesive acoustic masterpiece.

0:00-0:02: Grunts, scraping flint, crackling fire.

0:02-0:04: Echoing voices, clinking metal, bustling square.

0:04-0:06: Hissing steam, rustling paper, distant horse hooves.

0:07-0:10: Upbeat jukebox music, clinking glass, distant traffic.

0:10-0:12: Soft electronic hum, tapping screens, low traffic hum.

0:12-0:15: Soft magnetic hum and shimmering particle decay.

Snorricam

characters: A young woman

cinematic style: A gorgeous, vivid photorealist style using a SnorriCam rig, where the camera is physically attached to the actress's torso, creating a hyper-locked, dizzying perspective. 16mm film scan, heavily color graded, meticulously synced to a spatial audio mix.

framing: Extreme close-up, SnorriCam tracking.

subject: A young woman, the sole focus of the video. She maintains a completely center-locked face, her expression perfectly stoic, staring dead ahead regardless of the environment warping and evolving around her.

TIMELINE:

0:00-0:03 [The Mirror]:

description: A young woman viewed entirely from the front, positioned dead center of the frame. She stares blankly ahead.

action: She is meticulously applying bright red lipstick. The SnorriCam rig isolates her upper body perfectly. She finishes applying, leaning slightly back to admire the look. The background is a brightly lit, sterile bathroom.

0:03-0:05 [The Descent]:

description: The environment violently shifts and distorts. The bathroom disappears, replaced by the dizzying, strobing lights of a chaotic nightclub.

action: She is now holding a glowing green neon shot glass, seamlessly continuing the motion from the lipstick application. She raises the glass, her face maintaining its stoic lock on the lens while the club behind her spins wildly. She throws the shot back.

0:05-0:09 [The Drop]:

description: The shot glass disappears. She is now standing in the middle of a massive, pulsating rave.

action: She is intensely dancing, her upper body twisting and thrashing. The camera shakes violently with her movements, but her face remains perfectly anchored in the center of the frame. She breathes heavily, sweating, her eyes fixed on the camera. The background is a blur of laser lights and bodies.

0:09-0:12 [The Aftermath]:

description: The rave instantly vanishes. The lighting shifts to a harsh, cold fluorescent glow.

action: She is sitting in a booth at a greasy late-night diner, eating a french fry. Her movement is slow, exhausted, yet she remains locked on the lens. The diner behind her is empty and desolate.

Visual dynamics:

SnorriCam effect: The camera is flawlessly attached to her torso. Every time she moves her body, the environment appears to sway and spin around her, while her face remains eerily static in the frame.

Fast-paced transitions: The environment, lighting, and her attire fluidly bleed into one another. The transitions are rapid, seamless, and disorienting.

Strobing lights: The lighting in the club and rave scenes is aggressive, with heavy strobing effects syncing to the beat of the audio.

Color palette: The video shifts drastically from the clean whites of the bathroom, to the toxic greens of the shot, to the vibrant, chaotic neons of the rave, ending in the sickly yellow of the diner.

Perfect Loop: The end of the video matches the exact starting frame to create a perfect, infinite loop.

Acting, emotions and micro expressions

ARGUMENT - WHIP PAN FOLLOWING SPEAKER

15 Seconds | Continuous Shot | Dynamic Camera

VIBE: Tense, claustrophobic domestic argument. Two actors. Fast-paced overlapping dialogue. Camera whips between faces aggressively. Raw, unpolished, handheld documentary feel.

ACTION/DIALOGUE:

0:00-0:03 (Woman's POV)

Camera: Shaky handheld, focused on Man entering frame right.

Man (frustrated): "You promised. You said you'd be here."

Woman (defensive, off-screen): "Our appointment was at three o'clock."

0:03-0:06 (Man's POV)

Camera: Whip pan left to Woman.

Woman (angry, walking away): "I got held up at work. It's not a big deal."

Man (incredulous, off-screen): "Not a big deal? I took off work. I rearranged everything!"

0:06-0:09 (Woman's POV)

Camera: Whip pan right to Man.

Man (escalating): "You think I don't know that? You think I don't feel like shit about it?"

Woman (sharp, off-screen): "Feeling like shit doesn't change anything. It doesn't undo it."

0:09-0:12 (Man's POV)

Camera: Whip pan left to Woman.

Woman (exasperated): "What do you want from me? An apology? Fine. I'm sorry."

Man (cold, off-screen): "I don't want apologies anymore, David. I want you."

0:12-0:15 (Wide Shot)

Camera: Sudden pull back to a wide shot of the living room. Both characters are silent, glaring at each other. The tension is palpable.

Smartphone footage & UGC

15-second vertical screen 9:16. film grain filter + natural particles. location: Shanghai city skyline, sunset Golden Hour, warm light, shimmering river surface + silhouette of LuPu Bridge in the background. Theme: POV of a boyfriend walking a beautiful girl on a city street. Visual style: The overall color grading is warm and slightly retro, with high-quality smartphone vlog aesthetic. The entire video is shot with a boyfriend's Handheld POV follow-up, the camera continuously recording, NO CUTS.

0-4 seconds: Handheld follow-up, the girl walks two steps ahead of the camera. She turns her head to complain to the camera, pretending to be angry, one hand presses down on her wind-blown hair, the dialogue syncs with the audio track: "Walk faster! You're always dragging your feet!" The camera shakes slightly as she speaks. Sunset side backlighting outlines her cheek contours and floating hair in a warm glow.

4-8 seconds: The girl suddenly stops, looks at the river surface, the camera Smooth Pans towards the opposite bank following her gaze—Golden Hour warm light dyes her face gold, she smiles with her eyes narrowed. The camera slowly pushes in to a medium close-up.

8-10 seconds: The girl's eyes light up as she looks at a nearby stall, pulling the camera's direction and walking quickly. The Handheld camera generates unstable shake.

10-13 seconds: The girl is now holding a tall Tamsui soft-serve ice cream. She takes a big bite, looks at the camera and says (playful): "The first bite is for you~". She pauses for a beat, turns the ice cream to the camera, pretending to feed the camera. Because the ice cream is so tall, her nose tip brushes the top cream and gets a little white dot, looking very cute and silly.

13-15 seconds: Chewing the ice cream, she looks down at the cream on her nose tip, wipes it off with her finger in embarrassment, then bursts out laughing at the camera. The Handheld camera shakes drastically as the "boyfriend" behind the camera also laughs.

Constraint: Prohibit the appearance of text, subtitles, logos, or watermarks.

Realistic live-action style, vertical screen

Realistic live-action style, vertical screen, first-person opposite sitting perspective. Cozy Japanese izakaya interior, warm yellow paper lanterns emitting soft light, wooden tabletop with sake and small dishes.

A sweet Asian woman kneeling across from you, black straight hair reaching her waist, wearing a modified white kimono top paired with a black short skirt, revealing delicate collarbones.

Action description: She is lowering her head to pour the sake, her long hair slipping to the side under the light. After pouring, she looks up at you with slightly flushed cheeks, and with a tipsy smile softly saying: "Come on, have a drink with me."

Details: One hand holds the sake bottle, the other hand gently touching the bottom of the bottle. The camera perspective is first-person, as if you are sitting across from her. The atmosphere is charming and ambiguous.

SETTING: thermal pool at night

SETTING: thermal pool at night; warm steamy air; dark cinematic atmosphere; softly glowing underwater lights, water rippling gently.

LIGHT: Real iPhone look; slightly dim, warm ambient lighting; moisture on skin visible; no beauty filter.

CAMERA: iPhone front-cam feel; propped on pool edge; slightly imperfect framing; subtle micro-shake from resting position; no zoom.

SUBJECT: 20s woman; wet red hair slicked back; glowing, flushed skin from heat; relaxed expression; black thin-strap swimsuit; calm, confident tone.

MOVEMENT: minimal body movement; slight water movement; no music; no captions.

PROPS: No product visible in this segment.

ACTION: she rests her chin on her forearms at the pool edge; one hand gently touches the side of her face intermittently; occasional eye contact breaks; hands stay below collarbone.

DIALOGUE LOCK: keep speech exact, clear English, natural cadence. "Okay, so I used to break out constantly, like painful, hormonal acne every single month. And I'm not even kidding, I have zero acne now. The only thing I changed was adding zinc and omega-3 supplements to my routine. That's it."

VIBE: intimate, authentic, late-night story time; low-energy but earnest.

Low quality smartphone vlog footage

Low quality smartphone vlog footage, shaky handheld camera POV. A young, ultra-beautiful girl with cool white skin and gentle features named Lexx Aura is walking ahead on a wet street on a rainy night, wearing an oversized vintage chunky winter sweater. Colorful neon reflect on the wet pavement. High ISO noise, dynamic motion blur. She suddenly stops, turns her head back to look directly at the camera with a delayed autofocus effect, giving a casual, and slightly shy smile. Her loosely semi-tied long hair is slightly wet from the drizzle. She then steps very close to the lens, playfully tucking a wet strand of hair behind her ear. Asymmetrical framing, lens flares, heavy video grain, raw and unpolished snapshot aesthetic throughout the entire continuous shot.

POV Main Character

SCENE: FIRST-PERSON POV BATTLEFIELD - DUSK | OVERCAST ATMOSPHERE: Chaotic, claustrophobic, and intense. Mud, soot, and the metallic scent of blood fill the air. The sky is a bruising purple-grey, the fading light casting long, erratic shadows across a torn landscape of craters and shattered siege engines.

PERSPECTIVE: An unrelenting, unbroken first-person perspective shot from within the helmet of a heavily armored warrior. The edges of the frame are obscured by the dark, scratched metal of the visor. The camera simulates the heavy, jarring physics of a body taking a massive kinetic strike. Being knocked to the ground and the disorienting struggle back to the feet. The POV focuses on desperate survival, tracking the movements of massive, unstoppable enemies.

TIMELINE / SHOT-BY-SHOT:

0:00-0:03: (Charge and Strike) / 24mm Wide Angle / Shaky Handheld. Through the dark, scratched edges of a visor, a massive, grotesque Orcish brute throws a powerful punch directly into the knight's body, launching the subject backwards.

SFX: Loud, jarring impact.

0:03-0:06: (Sudden Aerial Tumbling / Hard Crash). The kinetic impact launches the armored subject into a violent, disorienting tumble. The horizon spins chaotically, mixing the gloomy sky and the mud. The subject crashes hard into the ground, a bone-rattling thud. A harsh, deafening tinnitus ring briefly masks all background noise.

SFX: Tinnitus ring, heavy breathing, the clanking of armor hitting mud.

0:06-0:10: (Looking up / Low POV). The subject lies in the mud, disoriented. The Orc looms above, towering and imposing, wielding a massive rusted battle axe. The camera simulates a rapid scrambling backward. The brute raises the axe and slams it down with savage force. The subject rolls desperately to the side, the blade embedding itself in the mud just inches away. Drastically shaking the camera on impact.

SFX: Heavy footsteps, whistling air, booming earth-shattering thud.

0:10-0:15: (Desperate Rise / Sword Drawn). The subject struggles back to their feet, the metal gauntlet frantically grabs a bloodstained broadsword from the muck. As the ogre charges forward again, the subject thrusts the blade up defensively. A massive impact forces the camera back, but the blade holds. The camera shakes violently under the sustained pressure. The subject is locked in a desperate struggle, pushing the broadsword steadily against the brute's massive axe.

SFX: Loud, screeching metal, the ogre strains against the blade.

TECHNICAL & RENDER:

Camera: Shaky, frantic, locked into POV, simulating the weight and limited vision of an iron suit.

Lens: Distortion from the edges of a visor.

Light: Diffused, bleak overcast dusk, cold color temperature with harsh metallic reflections.

VFX: Flying mud, sparks from colliding metal, rain splattering against the visor.

Render: Hyper-realistic physically based rendering, ray-traced lighting, highly detailed, raw footage, motion picture, 8k resolution, volumetric rendering.

POV: You're the main character in Mont Saint Michel

POV: You're the main character in Mont Saint Michel in the 8th century, multiple quick cuts

First-person POV perspective of Superman

First-person POV perspective of Superman flying at supersonic speeds through a realistic, cinematic skyline. His hands are outstretched in front of him, the iconic red and blue suit sleeves visible, subtle red cape fluttering at the peripheral edges of the frame. The camera angles slightly downward, capturing an epic superhero atmosphere, immersive FPV feeling. He dives down towards the ocean at incredible speed, skimming the water, his chest almost touching the water. The force of his flight carves a massive, roiling trench in the water behind him, illuminated by warm golden morning sunlight. Water droplets and mist whip past the camera lens, the mist trailing behind him. Volumetric lighting reflecting across the waves, dramatic motion blur, high-speed wind distortion, cinematic lens flare. He abruptly pulls up, rocketing vertically towards the distant city skyline. The camera remains in first-person view as he bursts through the clouds, the sudden brightness of sunlight flash across his hands and suit details. The city shrinks rapidly below him, extreme motion blur and subtle camera vibration from supersonic flight. Sunlight gleams off his suit and the condensation reflections streaking across frame. In the final moment, he exits the atmosphere, the sky transitions from blue to black, stars becoming visible, and finally propelling forward into the vast emptiness of space with a subtle sonic boom ripple expanding outward. Photorealistic, hyper-detailed, dynamic action, HDR lighting, epic powerful energy, seamless transition, no cuts, continuous 15-second shot.

Tracking Shot

Futuristic hovercraft on savanna hardpack with dust devils (10 seconds, single continuous shot).

The camera starts high in a slow, sweeping aerial orbit: the savanna sprawls below, tall grass rippling, hardpack surfaces baked light brown under a harsh afternoon sun. A sleek, super-fast futuristic hovercraft (low, aerodynamic, full aerodynamic skirts, flat black) is tearing at insane speed, throwing a razor-thin dust wake that peels into spirals away from the vehicle.

The camera maintains a rapid orbit while dropping altitude, sweeping around the front of the craft, locking into a brief orbit for scale, then a violent swoop closer, then back out. The hovercraft is floating half a meter above the dirt, glides centimeters above the hardpack, suspensionless but alive with micro-adjustments. It passes the camera in a blur, snap into a steep top-down lock for a beat, tracking the black roof tearing a line across the brown dust, kicking up small dust devils, then snap back down to ground level into the grass. Slingshot ahead for a brief head-on shot as the hovercraft smashes a small sapling, an explosion of dirt and grass, then whip around into a close side chase where the hull slices the air and dust detonates in clean sheets. Dive even tighter to the rear skirt/vent flow: grit and pebbles ping and ricochet backward at the lens, as the overall audio compresses into a nearcraft spiral, fast and relentless. A herd scatters far in the distance, unseen on screen. The craft cuts off-line through a narrow gap between two termite mounds, a sharp snap in path with a burst of vector thrust, then snaps back onto the track with a precise, aggressive correction. The camera sweeps through the dust tunnel in the craft's wake, then rockets upward into the final, fastest orbit: climb hard and fast back to height, speed up the frame flight speed, and a dramatic sun pillar drops onto the plains like a stage light, the hovercraft a glowing red dart below with dust devils trailing in its wake curling in the spotlight.

A cinematic and chaotic tracking shot

A cinematic and chaotic tracking shot with handheld camera motion and camera shake shows an explorer holding an ancient scarab artifact. They are running away from a giant pursuing mummy. Debris and dust clouds can be seen. The mummy is causing sections of the ancient wall to crumble. The explorer runs away while occasionally looking back, you can hear her heavy breathing. She continues running until she narrowly escapes once the mummy almost grabs her but it hits a pillar causing it to fall on itself, the explorer then continues running into the entrance of a tomb.

FPV Drone Follow-up

Fast-paced FPV drone tracking shot from behind, closely following a 3D anime-style girl with white hair skateboarding down a steep, winding mountain road at incredibly high speed. Extreme forward momentum, dynamic motion blur, and rushing effect. The video starts in a vibrant summer setting with lush green mountains, a bright sunny sky, a distant ocean, and brown leaves flying past the camera.

At the 3-second mark, a magical wave of frost sweeps forward from the skateboard; the environment seamlessly transforms into a freezing winter landscape. The green grass instantly turns to deep white snow, heavy snowflakes fill the air, and the green mountains become snow-capped peaks. The camera perfectly tracks the girl, smooth, continuous downhill tracking motion. High-quality cel-shaded 3D animation, photorealistic lighting.

FPV cinematic flight through a hyper-realistic treehouse

FPV cinematic flight through a hyper-realistic treehouse at golden hour: bridges, staircases, warm interiors, exiting through skylight, fast-paced dynamic camera.

Fast-paced FPV cinematic flying

Fast-paced FPV cinematic flying through a hyper-realistic, cozy treehouse in a dense forest at golden hour, sweeping through bridges, staircases, interiors with warm lights, and exiting through a skylight, with dramatic camera motion.

Cinematic War Scene

Cinematic realistic war footage, set in a modern Middle Eastern desert village. Low adobe houses and dilapidated alleys. High-contrast shadows, sand and gunsmoke lingering in the air, handheld camera movement, muted color palette (sandy yellows, dusty browns, faded greens), high tension and realism. Characters equipped as modern light infantry (body armor, helmets, tactical gear). Intense, chaotic, visceral atmosphere.

SHOT 1:

A small squad of modern light infantry advances slowly into the narrow alleyways of a Middle Eastern desert village. Low adobe houses and dilapidated walls close in on them, casting long, stark shadows across the dusty gravel path. The camera, positioned at waist height in a handheld follow shot, stays close to the ground, moving forward from behind the squad as the soldiers move cautiously, weapons raised and scanning the rooftops. The air is thick with

suspended dust motes, and a faint haze obscures the distance. The pacing is somber and restrained, hinting at an impending conflict.

SHOT 2:

A sudden, fierce burst of urban combat erupts around a corner in the same alleyway. The camera violently shakes as deafening gunfire echoes. Bullets strike the masonry, sending plumes of sand and debris flying. The camera pans wildly, capturing quick flashes of muzzle fire from unseen enemies. The squad reacts instantly, diving for cover behind low walls and shattered doorways. The lighting is harsh, starkly illuminating the chaotic dust clouds. Close-ups show frantic reloads and panicked shouts. The scene is frantic, confusing, and aggressively loud.

SHOT 3:

The squad presses forward after the firefight, and the end of the alley reveals the entrance to a bombed-out house, its walls half-collapsed and rebar exposed. The camera follows the soldiers into the ruined structure from an over-the-shoulder perspective. Inside, the air is thick with smoke and swirling dust, beams of sunlight piercing through the gaps in the wreckage. Dust motes float in the shafts of light. The soldiers move quickly, clearing the room. The camera sweeps across the shattered interior, highlighting the devastation, and the mood shifts from chaotic to a silence of extreme vigilance.

SHOT 4:

The squad seizes a high vantage point, overlooking the entire network of alleyways. The camera transitions from a tight focus on the soldiers to a sweeping, wide shot. A massive explosion goes off in the distance. The camera pulls back slowly, framing the soldiers as silhouettes against the backlight, their forms stark against the bright, dusty horizon. The low sun casts long shadows, painting the scene in dramatic golds and deep blacks. The village lies quiet in the distance—yet brimming with hidden danger. The frame freezes on this tense, beautifully lit tableau, summarizing the relentless dread of an ongoing conflict.

Live-Action Landscape Switching

Ultra-fast metric montage switching live-action landscapes of tourist attractions and World Heritage sites from around the world in 0.1-second increments. Start with Tokyo Tower, end with Skytree, and randomize the middle for surprise. Each cut is a still image but all video, with added camera work. Filmed using advanced shooting techniques professional photographers. Depth of field. Foreground blur and background blur. Advanced lighting. Dynamic angles.

Horror

A 13-second POV horror sequence set in a pitch-black, abandoned hallway. The air feels grimy, peeling walls covered in faded graffiti. The darkness is oppressive, pierced only by a slithering, weak flashlight beam. In the center of the corridor, a weathered wooden rocking horse slowly creaks back and forth. Suddenly, it begins to rock—slowly at first, then with violent, bone-creaking intensity, its hollow thuds echoing against the concrete.

After a rapid jump-cut through total darkness, the flashlight flickers back on to reveal the entire hallway now packed with dozens of identical rocking horses, all perfectly aligned and swaying in a sinister, synchronized rhythm. The collective sound of wood hitting the floor creates a deafening, heartbeat-like roar.

The sequence ends with a visceral jump scare: the rocking abruptly stops. The flashlight beam jerks upward, illuminating a terrifying, manical, carved grin and viscous black liquid pouring from the ceiling. A twisted form lunges directly into the lens, its face filling the frame as the audio peaks into a distorted screech.

First-person POV video, dimly lit abandoned room

First-person POV video, dimly lit abandoned room in an old house at night, 1990s aesthetic, viewer (the protagonist) kneels in front of a dusty, unmade bed, the light is supplied entirely by a weak, dying flashlight. The POV hands reach in and pull out a worn, unlabeled black VHS tape covered in dust, sliding it out of a frayed cardboard sleeve. The tape bears a piece of torn, yellowed masking tape with the cryptic title "WATCH ALONE", camera shakes slightly with nervous breathing. The POV hands move to the left, inserting the tape into a VCR on a low TV stand, static snow flickers on the bulky CRT television as it whirs to life, casting a cold, eerie blue glow across the room.

The screen cuts to a grainy, black-and-white security camera feed, timestamped in the corner (e.g. 03:17 AM, date obscured), the footage shows this exact room, taken from a high, downward-facing corner angle—wide shot including the dresser, the TV, the spot where the viewer is currently sitting, analog tracking lines distort the image. On the footage, the room appears empty, a ceiling fan slowly spins. The low frame rate recording creates an eerie infinite mirror effect.

Suddenly, a tall, translucent, humanoid silhouette—pale gray, blurry, heavily distorted—walks into the frame on the TV screen. It moves with a jagged, unnatural gait, approaching the seated protagonist in the video, inches from his shoulder, unseen by him in reality. A low, guttural humming fills the room, faint static distortion pulses around its form like bad reception. The POV hands in reality physically flinch, camera jerks back in shock, as realization hits that the ghost is standing in the exact same position now, just off frame to the right in the current room.

The entity in the footage slowly turns its head towards the protagonist's shoulder, screen glitches harder with horizontal tearing and audio whines, POV swings around frantically to look behind himself—room empty in real life but the TV footage now shows the ghost's face inches from the camera. The entity lunges at him, screen shatters into static. Highly detailed, raw footage VHS degradation—tracking errors, color bleed, audio hiss. Atmospheric, terrifying impossibility, sense of being watched from both past and present, no jump scare just unrelenting, creeping dread.

[FORMAT] 16:9 | Vertical | Northeast Rural Food Vlog + Alien Horror ASMR

[FORMAT] 16:9 | Vertical | Northeast Rural Food Vlog + Alien Horror ASMR

[Audio Note] All scenes use ASMR recording style. Close mic placement, capturing all subtle squishes, crackles, and sizzling.

[Visual Style] Standard Northeast Chinese rural kitchen. Grimy, heavily used wok. Warm, slightly dingy lighting. The contrast between mundane cooking and the alien ingredients is severe.

[SHOT 1: 0.0s-1.5s] Entry

Action: Woman walks in from a doorway to a cutting board carrying a struggling alien creature.

Details: The kitchen is a standard, slightly messy rural kitchen. On her shoulder she carries a 3-foot long, vibrant cyan and purple arthropod. It resembles a giant isopod mixed with a mantis shrimp. Its multiple legs twitch and writhe, scales rub into each other making a clicking sound. It ends in a transparent fan-shaped tail fin twitching nervously. She drops it onto a heavy, scarred wooden chopping block.

Sound: Heavy footsteps, clicking of the creature's shell, wet thud on the wood.

[SHOT 2: 1.5s-2.5s] Creature Close-up

Action: Extreme close-up of the creature, shallow depth of field.

Details: The creature is alive, its mandibles clicking rapidly. The camera focuses on a transparent pale green liquid slowly seeping from the crevices, alongside a glowing iridescent purple fluid pulsing beneath its translucent shell.

Sound: Rapid clicking, a soft squelching as the liquid drips.

[SHOT 3: 2.5s-4.0s] Cracking Open

Action: The woman raises a heavy cleaver. She chops the cleaver into the creature's back, cracking the shell open.

Details: The impact is violent. She pries open the shell. The inside is filled with fluorescent purple wriggling muscle fibers and thick, viscous cyan slime that strings out as she pulls. She reaches in and scoops out a handful of glowing meat.

Sound: Loud CRACK of the cleaver, tearing of flesh, thick wet squelching, stretching slime.

[SHOT 4: 4.0s-5.0s] Garlic and Spices

Action: Over-the-shoulder shot looking down into the hot wok.

Details: A worn, blackened wok sits over a high gas flame. Oil shimmers. The woman tosses in a handful of crushed garlic cloves and dried red chili peppers. They instantly sizzle and pop, blistering in the oil.

Sound: Explosive sizzling, popping, crackling of the hot oil.

[SHOT 5: 5.0s-6.5s] Stir-Fry

Action: The woman tosses the alien meat into the hot wok. Over-the-shoulder shot.

Details: The purple meat hits the oil with a violent hiss. The cyan slime reacts with the hot oil, bursting into small, bright green sparks. The meat curls and sears rapidly, the edges turning a charred black while the center remains a glowing purple. She tosses the wok expertly, flames licking up the sides.

Sound: Violent hiss, intense sizzling, clanking of the metal spatula against the wok, roaring gas flame.

[SHOT 6: 6.5s-7.5s] Plating

Action: She scoops the cooked dish onto a large plate.

Details: The cooked meat is a mixture of charred edges and vibrant, pulsating purple centers. The green slime has reduced to a thick, glowing glaze. Steam rises heavily. She sprinkles chopped green onions over the top.

Sound: Scraping of the spatula, wet sliding of the food onto the plate, soft sizzling.

[SHOT 7: 7.5s-12.5s] Tasting (Jump Scare)

Action: Wide shot. The woman sits at the table, taking a bite.

Details: She picks up a piece with chopsticks, blowing on it. She takes a bite. The camera punches in slightly. As she chews, a thick strand of glowing cyan slime stretches from her mouth to the meat. Suddenly, the piece of meat in her chopsticks twitches violently, and a small, sharp mandible snaps out, biting her lip. She drops the chopsticks with a startled gasp.

Sound: Chewing, squishing, a sudden sharp SNAP, a startled gasp, clattering chopsticks.

Epic Fantasy

"Master-prompt": "Epic fantasy scene, color palette shifts intensely between icy blue and blazing red, atmosphere of extreme tension and awe, highly cinematic."

"Characters": [

{ "name": "Silhouette Figure", "appearance": "A small humanoid silhouette, solitary and helpless against the vast snow" }

{ "name": "Black-Red Dragon", "appearance": "A massive black and red dragon, diving down from the sky, exuding majestic dominance" }

A rugged mountain traveller crosses a snow-covered ridge

A rugged mountain traveller crosses a snow-covered ridge under a cold, overcast sky. The camera tracks him in a medium framing. His heavy boots press into fresh snow and scattered stone. The camera tracks low and steady, emphasizing the bleak atmosphere, and drifting frost.

Nearby stands a large mountain boar used as a pack animal. Thick bristles catch the wind. Its back is fitted with secured travel supplies: bundled blankets, rope, coils, wooden containers, and strapped gear that gently shifts with movement. The traveller reaches the animal, grips the saddle frame, and climbs onto its back in one smooth, practiced motion. He leans forward slightly and guides it with a light cue.

The boar begins moving down a narrow switchback path. The camera pans out to a wide shot, showing them descend steadily through mist and falling snow, cliffs rising on either side, the valley fading into grey white.

Anime

Anime girl parkour escape: rooftop flips between skyscrapers, wind-swept ponytail, pursued by black agents, neon night city, cel-shading, dynamic low-angle tracking, realistic jumps/physics.

Epic Apocalyptic & Disaster

A cinematic apocalyptic disaster scene in a modern city. Massive bridge collapsing into the river, huge explosions destroying skyscrapers, buildings shattering with debris flying, people running in panic through dust and chaos. A giant meteor falling from the sky causing a massive shockwave, tsunami waves flooding the city streets, dark stormy clouds, dramatic lighting, ultra realistic, cinematic camera movement, slow motion destruction, high detail, 4K, epic scale, intense atmosphere, movie-like quality similar to Hollywood disaster films.

The camera plunges forward through a flooding submarine corridor

The camera plunges forward through a flooding submarine corridor, closely following a sailor desperately sealing bulkhead doors amid torpedo impacts. Water pours violently, electronics spark dangerously. The sailor navigates floating debris, leaps between slippery decks, and manually activates an emergency ballast valve just as flooding stops inches from critical equipment.

Advertising

Close-up beauty shot of a woman elegantly applying black mascara to her long lashes, slow smooth brush strokes, lashes lengthening and curling dramatically, soft luxurious lighting,

confident eye reveal at cinematic product advertisement style, high detail, 4K, subtle brand logo fade-in
